EXPERIENCE

INTERNSHIP

The Sparks Foundation (TSF)

May – June 2022 Remote

- Data Science & Business Analytics, Graduate Rotational Internship Program (GRIP)

LEAD TRAINER IN DATA

Tec4Tchad (Simplon/Université de Ndjamena)

September 2021-January 2022 Ndjamena, Chad

Tech4Tchad is a project funded by the French Embassy in Chad and implemented by the association Simplon.co Afrique, in partnership with Wenaklabs, ChadInnovation, Université de Ndjamena et l'Institut pour la Recherche et le développement (IRD). I am ensuring the application of active pedagogy by others trainer and teaching students for professional bachelor in Data developer courses such as:

- Python programming;
- Introduction to Machine Learning;
- Git & Github.

INDEPENDENT CONSULTANT

ONG ESSOR-Tchad

March – July 2021 Ndjamena, Chad

- Production of the Professional Integration and training opportunity in Chad guide for the Bab Al Amal project (Composante 1).

INDEPENDENT CONSULTANT

AAN Associates Pakistan and Fieldork Africa

February – April 2021 Ndjamena, Chad

- Conducting KII (qualitative data collection) with personalities at Central Level (Ministry of Public Health), UNICEF Chad Country office, Regional Level (CH focal point at Regional Health Delegation Level), District Level (Community Health District focal point and Chief Medical Officer) and Donors and implementation partners(international and local NGOs/CSOs)
- Translation (in English) and transcribing of all interviews.

INTERNSHIP

Limbe City Council

July 2019 – January 2020 Limbe, Cameroon

- Topic: Design and implementation of a database management system with website as an interface for civil status documents(Birth, Death, and Marriage certificate)

INTERNSHIP

CST (Compagnie Sucrière du Tchad)

July 2015 – August 2015 Chad

- Revision and rewinding of asynchronous motors;
- Maintenance of the generators (FG WILSON, PRAMAC, etc);
- Revision of the actuators and transmitter sensors.

PROFESSIONAL TRAINING

Professional Certification in Data Science

Data Insight

Sep2021 – Aug 2022 DataCamp

Bootcamp in Deep Learning (intensive training) organized online by Neuromatch Academy

02– 20 August 2021

- Our group project was in Computer Vision: American Sign Language Recognition.

Training with a certification online by University of Michigan, COURSERA

February-March 2020

- Python 3 programming

Deep Learning + Reinforcement Learning Summer school organized by Quebec Institute for Artificial Intelligence (MILA) and CIFAR

03-07 August 2020

- Deep Learning and Reinforcement Learning

Big Data for Development mini Course

Dr. Dunstan Matekenya (Data Scientist at the World Bank Group Headquarters in Washington DC.)

24th-28th February AIMS Cameroon, Yaounde

- Topic: Big Data Analytics with Python.

EDUCATION

Master of Science(MSc) in Machine Learning (Natural Language Processing, Computer Vision and Reinforcement Learning)

African Institute for Mathematical Sciences

2022–223 Mbour, Senegal

Co-operative Master in Industrial Mathematics with interest in Data Sciences

African Institute for Mathematical Sciences

2018 – 2020 Limbe, Cameroon

Master in Electronics, Electrical engineering, Automatics

University of N'Gaoundéré

2017-2018 N'Gaoundéré,Cameroon

TECHNICAL SKILLS

Python - Pytorch
Matlab - Latex - HTML
R (Statistical analysis)

PROJECTS

MACHINE LEARNING PROJECT

Predicting a term deposit subscription by a client using Bank Marketing data with Python

2019 AIMS, Cameroon

DATA ANALYSIS PROJECT

Identify waiting time problem (bottlenecks) in the hospital using R programming

2019 AIMS, Cameroon

IMAGE PROCESSING PROJECT

Segmentation by active and geodesic contours and implementation of a utility (GUI) for management using MATLAB - Simulink

2018 University of Ngaoundere

MSc PROJECT

Optimization of energy transfer in photo-voltaic system (Defended on November 2019)

2018 University of Ngaoundere

MSc PROJECT

Hybrid Architecture for Long Short-Term Memory and AutoRegressive: Application in Time Series Data for Birth Prediction

2020 AIMS Cameroon

SOFTWARE & FRAMEWORKS

- Anaconda, Scikit-learn, Numpy, Pandas, Matplotlib, Seaborn etc;
- PROTEUS, Simulink (Mathlab) (Electronic);
- Excel, R-Instat, R-Studio (Analysis and statistic);
- Berkeley Madonna, SageMath(Mathematical modeling and computational);
- TeXstudio, Microsoft office.

SKILLS ACQUIRED

- Data analysis and statistics;
- Natural Language Processing and Computer Vision;
- Operation Research (Optimization with Simplex and non linear Methods);
- Electrical Engineering: asynchronous and synchronous motors;
- Electronics: digital and analogy;
- Automation: linear and non-linear servo systems, sampled servo-controls, Neural; Network, Unsupervised Supervised learning, Grafcet;
- Basic Web development.

AWARDS

- African Master's of Machine intelligence(AMMI) full scholarship, Google and Facebook Scholar;
- Data Insight scolarship for Data Science program;
- African Institute for Mathematical Sciences (AIMS) full scholarship , MasterCard foundation Scholar.

LANGUAGES

- **French;**
- **English.**

REFEREES

Dr. Marcellin ATEMKENG, Centre for Radio Astronomy Techniques & Technologies (RATT), Department of Mathematics, SA
@ Rhodes University| South Africa
m.atemkeng@ru.ac.za
Mobile (+237) 67 753 90 04

INTERESTS

- Reading, travel, society games
